

Free Your Metadata

Inexpensive data publishing
for governments

dr. Erik Mannens

“Publishing **Linked Data**
is **difficult** – therefore,
we need **experts.**”

**“Experts are expensive,
so we can’t afford
Linked Data.”**

These are excuses of the past.

- What would you do with a data tool that is
 - non-technical,
 - inexpensive,
 - freely available?

Use Google Refine on your data.

- **The Free Your Metadata initiative aims to**
 - spread know-how on how to use Google Refine
 - scientifically study Linked Data use cases
 - impressive results with cultural heritage metadata

Video: Free Your Metadata introduction.

Time to free your own data.
